Exploring Career Options

Here are a few great websites to explore different careers. Look for options that fit your *personality*, your *interests*, and your *skills*.

www.TexasRealityCheck.com

With the “Lifestyle Calculator” you can find out how much money you should aim to make in order to live the life you want to live. This helps put a future job into perspective.

www.MyNextMove.org

This website has a test (under the area “Tell us what you like to do”) that you take to gauge your interest in various fields. You can explore fields within any of the 6 interest areas to see specific careers depending on the amount of job preparation you choose to have. Then, you may click on a career to see what they do, how to become one, and even average salaries.

Explore different careers on this website!

www.16Personalities.com (Myers-Briggs Typology)

This personality test breaks down people into 16 personalities along four different axes: Extraversion versus Introversion, Intuition versus Sensing, Feeling versus Thinking, Perceiving versus Judging. By taking personality tests, you may learn more about yourself and find out the careers that best suit the ways you think and make decisions. Remember that a personality test doesn’t tell you what kind of person you are. Instead, it gives you ideas with which you can either agree or disagree for your own life.
